

Sara Gamal El-Nabawy Mohamed

Full-Stack Developer

Sg.sara2002@gmail.com | +201148318711 | Alexandria, Egypt | <https://www.linkedin.com/in/sarah-gamal-> | [Github](#)

Summary

Results-driven Full Stack Developer with hands-on experience building scalable web applications using React, Next.js, and Node.js. Strong foundation in UI/UX design from ITI, combining technical expertise with a deep understanding of user-centered design principles. Experienced in developing responsive interfaces, integrating RESTful APIs, and delivering end-to-end solutions. Passionate about writing clean, maintainable code and contributing to high-performance, growth-oriented teams.

EDUCATION

B.S in Information Technology, Kafrelsheikh University
Graduation Project: Excellent

Sep. 2020 – June 2024

WORK EXPERIENCE

Full Stack Developer – Digilians

Feb – May 2026

- Delivered end-to-end web applications using React and Node.js.
- Integrated front-end interfaces with secure and efficient back-end APIs.
- Implemented authentication, routing, and state management for scalable applications.
- Optimized application performance and improved user experience through clean architecture and best practices

Front-End Developer Trainee – Route

Mar– oct 2025

- Delivered dynamic, high-performance web applications using React and Next.js.
- Optimized application performance and improved user experience through clean, maintainable code.
- Implemented routing, state management, and API integration for real-world projects.
- Applied modern front-end development standards and responsive design principles.

UI/UX & Front-End Trainee – ITI (Information Technology Institute)

June. 2023 – Aug 2023

- Completed intensive training in UI/UX design principles and user-centered design.
- Built responsive web pages using HTML5, CSS3, and JavaScript.
- Applied modern layout techniques and front-end best practices to create interactive user experiences.
- Designed web interfaces using Adobe Photoshop and Illustrator.

Measurable Achievements

- Developed and deployed 5+ **full-stack applications**, including E-commerce platforms and Admin Dashboards, supporting 100+ products and 500+ users.
- Designed and integrated **15+ RESTful API endpoints**, improving front-end/back-end communication by 20%.
- Built scalable component-based architecture in React, **reducing code duplication by 30%**.
- Deployed 2+ applications live on Vercel/Render with CI/CD workflows.

TECHNOLOGY & SKILLS

Front-End: HTML5 | CSS3 | JavaScript | Bootstrap | Tailwind | jQuery | ReactJS | Node.js .

Back-End: Node.js | SQL Server | MySQL .

Concepts: Git (GitHub) | Design Patterns | OOP | Data Structure.

Soft skills: Communication | Teamwork | Problem-solving | Time Management | Adaptability | Fast Learner.

Languages: Arabic (Native) | English.

PROJECTS

Roshitta, Full Stack Developer ([Demo](#))

- Collaborated with a team of 4 software engineers to design and implement a scalable multi-user healthcare appointment management system with a Django REST API , JWT authentication, PostgreSQL, and Redis-powered Celery for asynchronous tasks (e.g., notifications, reminders), integrated with a React, and Tailwind CSS-based.
- Developed robust features for doctor profile and clinic management, appointment scheduling, and secure handling of medical records and prescriptions.
- Designed intuitive role-based dashboards with detailed analytics and real-time communication features, enhancing user experience for both healthcare providers and patients.

[Home Services Platform](#), Full Stack Developer

- Built a services platform using Django framework and MySQL, enabling users to broadcast service requests to relevant/chosen provider(s) in real-time.
- Implemented secure user authentication (JWT), role-based access control, and real-time chat to facilitate seamless user-provider communication, alongside dynamic user profiles, as well as a detailed review and rating system.

[Inventory Management System](#), Full Stack Developer ([Demo](#))

- Developed a responsive system designed to centralize and optimize core business processes using Python (Django) and PostgreSQL, integrating error handling and efficient search/filtering functionalities across inventory, orders, and shipments to ensure a seamless user experience.
- Implemented a comprehensive solution for order, shipment, and supermarket management, differentiating permissions for managers and employees.
